DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 12-18, drawn to a film.

Group II, claim(s) 11, drawn to a heat-insulating member.

Group III, claim(s) 19-27, drawn to vacuum heat insulator.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. Under PCT Rule 13.2, the expression "special technical features" means those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

Claim 1 is directed to a film comprising a resin layer having an IR absorptivity of lower than 25%, an IR reflection layer having a reflectivity of 50% or higher, and an adhesive layer. The features of this claim are disclosed by US 4,076,889. US 4,076,889 teach a film of a fluoroolefin copolymer laminated with a metal (column 1, lines 51-64). A suitable fluoroolefin copolymer is ethylene tetrafluoride-ethylene copolymer (column 2, lines 38-39), i.e. ETFE which is disclosed as having an IR absorptivity of 8% on page 13 of the instant specification. The

Art Unit: 1794

metal may be gold, silver, aluminum, copper, or nickel and may be bonded to the film by means of an adhesive (column 3, lines 56-63). Because each of these metals are cited as suitable materials for the IR reflection layer (see paragraph bridging pages 13 and 14 of instant specification), they are taken to intrinsically possess an IR reflectivity that meets the limitation of instant claim 1.

Since the features are taught by the prior art, claim 1 has no "special technical feature" as the term is defined under PCT Rule 13.2. Therefore, the claims cannot share the same or corresponding special technical feature and unity of invention is lacking.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
